

14 June 1973

MEMORANDUM FOR: General Graham

SUBJECT: Next Meeting of the NSCIC

1. I talked with Andy Marshall today and learned that, although he submitted a request for an NSCIC meeting in July about three weeks ago, no action will be taken on this until after the Brezhnev visit and there is some indication of what Dr. Kissinger's responsibilities arising from the Brezhnev visit are going to be.

2. Andy would like to talk to you concerning the next NSCIC meeting because he considers that an important element of such a meeting should be an action on a Working Group program proposal.

3. He currently envisages the agenda as including three items:

a. The report on the three crisis studies and the DCI response.

b. The proposed Working Group program.

c. Andy's net assessment proposal.

4. Dr. Kissinger now has the net assessment paper drafted by Andy and his committee but Andy has had no indication of a reaction to it. An old list of possible net assessment topics is being reviewed by Andy and when updated will be sent to Dr. Kissinger.

5. Andy would like you to call him for further discussion of his proposal for preparation of a memorandum outlining the Working Group future program.
